Web Application Vulnerability Report

Target: http://testphp.vulnweb.com

Generated: 2026-08-13 02:12:39

Risk Score	Risk Grade
56 / 100	**D**

This report was generated for educational purposes as part of a semester project. Only scan systems you own or are authorized to test.

1. HTTP Security Headers

Error: Request timed out.

2. SSL/TLS Certificate

Site is not served over HTTPS.

3. Open Ports

Port	Service	Note
21	FTP	Often unencrypted; credentials can be sniffed.
80	HTTP	Expected for web apps; check if HTTPS redirect exists.
443	HTTPS	Expected for secure web apps.

4. Exposed Sensitive Paths

No sensitive paths exposed from the checklist.

5. Score Breakdown

• No HTTPS/SSL in use (-20, high)

• SSL issue: Site is not served over HTTPS (using plain HTTP). (-10, high)

• Risky port open: 21 (FTP) (-10, high)

• Port open: 80 (HTTP) (-2, info)

• Port open: 443 (HTTPS) (-2, info)
